

Safe Homes_Kolkata, North 24 Pgs, South 24 Pgs

COVID positive patients who are either asymptomatic or showing mild COVID symptoms, with no breathing trouble and comorbidities (such as COPD, high pressure, cancer, diabetes, heart or kidney related issues, hypertension) are advised to stay in home isolation by following MoHFW and WBHealth guidelines. During home isolation, patients must stay in separate rooms and use separate toilets, in order to avoid spreading of infection into their family members and surrounding people. Patients should remain under the supervision of physicians and may regularly check their blood oxygen saturation (SpO₂) level using pulse oximeter (if possible). In case, they cannot avail separate room/toilet facility, they may go to 'Safe Homes'. All Safe Homes provide facilities such as ambulance service, nutritious food supply, regular health check up by physicians, regular monitoring of SpO₂ level, collaboration with hospitals where the patients will be readily transferred in time of emergencies.
